() Authorizes the practice of "teledentistry" which, as used in this section, means the delivery of dental health care and patient consultation through the use of telehealth systems and technologies, including live, two-way interactions between a patient and a dentist licensed in this state using audiovisual telecommunications technology, or the secure transmission of electronic health records and medical data to a dentist licensed in this state to facilitate evaluation and treatment of the patient outside of a real-time or in-person interaction. Dentists who are licensed in this state and who deliver services using teledentistry shall establish protocols for the practice that should include proper methods of keeping the patient fully informed; proper safeguards ensuring that all state and federal laws and regulations relative to the privacy of health information are followed; proper documentation of all services or treatment rendered via teledentistry; proper procedures to ensure the referral of those patients requiring treatment beyond what can be provided via teledentistry to a dentist licensed in this state; and any such requirements as prescribed by the board of dentistry. Any and all services provided via teledentistry shall be consistent with the in-person provision of those services. Any and all services provided via teledentistry shall comply with this chapter and shall be provided in accordance with the rules of the board of dentistry.

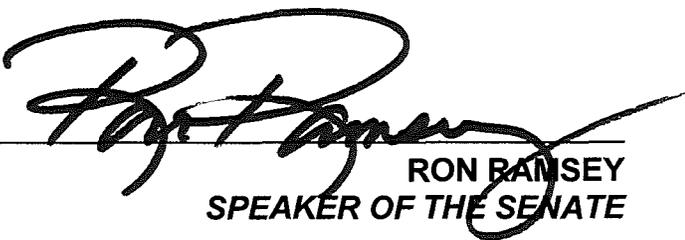

SECTION 2. Tennessee Code Annotated, Section 63-5-115, is amended by adding the following as a new subsection to be appropriately designated:
