Event Description: Numbered balls are dropped off a bridge at one part of the creek with a finish line at another point in the creek. The finish line is a funnel system. The balls are collected into a long, ball-width container with a viewing window. The first ball in wins the Grand Prize, 2nd ball wins the 2nd prize, etc. When the correct number of balls are collected (10 balls for 10 prize), the container is locked with a padlock before exiting the creek. Since the numbers on the balls can be viewed and verified through the viewing window, the balls remain locked in the container until the next year's event.

Winners do not have to be present to win.
