

Minutes
State Election Commission Meeting
July 8, 2013

The State Election Commission meeting was called to order by Chairman Jimmy Wallace at 12:15 p.m., Central Standard Time July 8, 2013. The following members and staff were present: Commissioners Blackburn, Head and Younce; Coordinator of Elections Mark Goins; HAVA Attorney Cara Harr; HAVA Coordinator Wayne Pruett and Kathy Summers, Elections Specialist. Commissioner Tom DuBois listened by telephone and did not vote.

Motion was made, seconded and unanimously approved to adopt the minutes from May 13, 2013.

Motion was made, seconded and unanimously approved to adopt the minutes from June 14, 2013, telephonic meeting.

Pursuant to T.C.A. § § 2-12-101 and 2-12-106, motion was made, seconded and unanimously approved to accept the nominations for county election commission appointments as submitted by commission members and to remain open until the close of business (4:30 p.m. Central Standard Time). **(See attached list of appointments made.)**

Old Business

- None

New Business

- **RBM /Unisyn** – No presentation given by Unisyn as they requested to be taken off the July agenda.
- **ES&S – EVS 5.0.0.0 release which consists of the DS200 precinct tabulator, DS850 central tabulator and AutoMark hardware components.** – Steve Pearson, Vice President, ES&S Voting Systems and Benjamin Swartz, State Certification Manager, ES&S Voting Systems gave the presentation and addressed questions presented. A copy of the information packet given out is attached to the minutes.

Motion was made, seconded and unanimously approved to certify the ES&S voting machine EVS 5.0.0.0, which has an EAC certification number of ESSEVS5000 given by the EAC on May 16, 2013. A copy of the EAC certification is attached to the minutes.

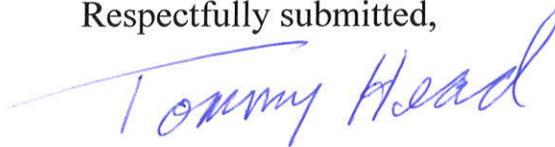

Coordinator Update

- Coordinator Goins spoke regarding the TACEO seminar and conference. He asked that the county attendance records be incorporated into the minutes. Attendance records are attached to the minutes.
- Former Administrators of Elections who attended the TACEO seminar were as follows:
 - Ray Barrett – former AOE Davidson County
 - Ed Kuncitis – former AOE Sevier County / currently working in Sevier County
 - Tammy Smith – former AOE in Macon County / now currently working in Wilson County

The next meeting is August 12, 2013. The meeting will be held in the William R. Snodgrass – Tennessee Tower, Nashville Room - 3rd at 12:00 Noon Central Standard Time.

Motion was made to adjourn, and there being no further business to come before the commission at this time, the meeting was adjourned.

Respectfully submitted,

Tommy Head, Acting - Secretary
State Election Commission

ELECTION Systems & Software

ES&S takes great pride in our opportunity to support clients with their election administration needs. Every election reinforces an important tradition valued across our county -- a citizen's right to vote. Our customers carry the responsibility to administer fair and accurate elections. They benefit from Election Systems & Software's unwavering pledge to support their needs.

To fulfill our promise, we assign teams of passionate, knowledgeable and talented election professionals to support the management of your elections. These individuals work diligently to help achieve a shared mission of **maintaining voter confidence** and **enhancing the voting experience**. We stand behind our work and guarantee our service; the quality is unrivaled. Providing our customers with trusted, quality and timely election services and products is our purpose, our promise and our passion.

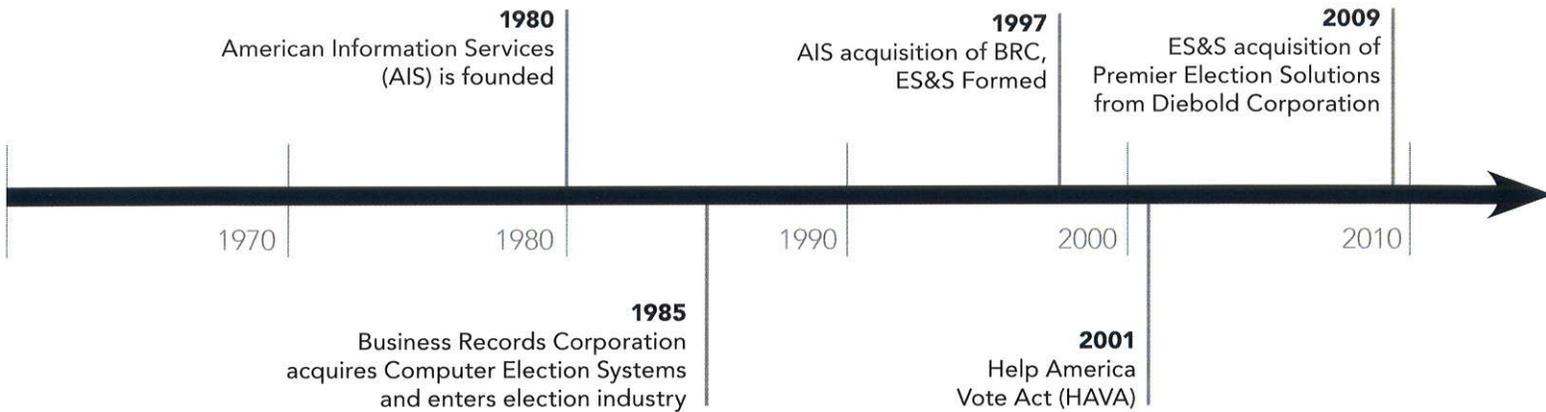

experience.
reliability.
security.
innovation.

History

In 1980, American Information Systems (AIS) entered the election industry to provide innovative solutions to tabulation. At its time, AIS was known as the leader for Central Scan Tabulation Technology.

Five years later, Business Records Corporation (BRC) acquired Computer Election Systems in Berkeley California to enter the industry. BRC strived to become the main provider of Precinct Scan Tabulation Technology. AIS and BRC joined forces in 1997 to form Election Systems & Software. The company dedicated themselves to incorporate the highest quality scanning solutions into precinct and central count tabulation. It has been 15 years since that partnership began, and the philosophy has remained consistent – provide better election every day.

Our Business

Election Systems & Software entered the elections industry as a vote tabulation company. As election needs evolve, ES&S expands their offerings to consistently provide high-quality, innovative solutions—ultimately improving the democratic process. We pride ourselves on the ability to understand and manage all aspects of the election process. From voter registration and ballot layout to election night reporting, ES&S provides our customers with the most robust elections support in the world.

Today, we work with the same customers we have served for over 35 years, and our business has grown to serve four countries, 41 states and more than 4,000 election offices.

Sustainability

Defined as the ability to endure, the word “sustainability” has come to mean many things in the election industry. At ES&S, our role in sustainability primarily serves your need for reliable, timely equipment maintenance and certification of operability.

MAINTAINING VOTER CONFIDENCE. ENHANCING VOTER EXPERIENCE.

Project Management and System Implementation

ES&S is staffed with a large network of PMI-certified Project Management Professionals. We ensure a smooth transition with beginning-to-end guidance.

Whether you are refreshing protocol on your current system or implementing new hardware and software, we can help.

- Project planning
- System integration management
- Activity and task scheduling
- Risk management
- Deliverable tracking
- Resources allocation
- Knowledge transfer and training
- Project and activity reporting
- Contingency planning

Technical Services

Let ES&S take care your technical needs, so you can focus on other tasks. ES&S experts can assist with any technical service. Ranging from basic computing support to advanced system and WAN network installations, we do it all.

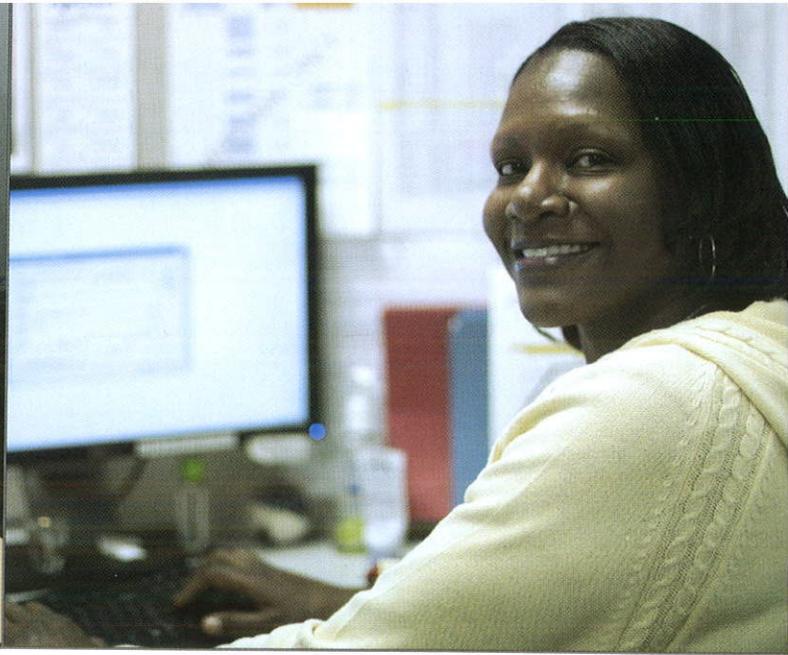

- Create election or jurisdiction database
- Design and layout ballots
- Program tabulation equipment
- Support pre-election and Logic and Accuracy testing
- Install software, systems, or networks
- Harden network and security
- Backup and store data
- Service post-elections needs like recounts and audits

“...thank you for your dedication and services in making our 2010 and 2012 elections a success... you have not only met those deadlines, but developed new innovations in which to accomplish the tasks and to improve the process.”

— **Maryland State Board of Elections**

“ It’s nice to know when you are under pressure you can have someone walk you through step by step.”

— **Anonymous Survey Customer**

Consulting Services

Our consultants leverage election experiences from each customer to build their vast knowledge. With 4,022 years of experience shared among ES&S associates, it's no wonder we're the experts. Through consulting services, customers receive an in-depth review, proven advice, and a unique experience tailored to your circumstances resulting in process improvements for Election Day and post-election day. Avoid "reinventing the wheel", let ES&S' consultants help pave the way to your success.

- Election process: improve pre-election, Election Day, and post-election process
- Technical: integrate networks and systems
- Warehouse: improve workflow, maintenance and storage
- Election 'Best-Practices' Consulting: implement industry-developed highest standards
- ADA: ensure compliance with the Americans with Disability Act
- Custom Documentation—assist and develop customized documentation and Standard Operating Procedures (SOPs)

Our People... Our Differentiator

- 350 years of election-specific experience among our Professional Services team
- Certified Project Management Professionals through Project Management Institute

- Certified Microsoft Experts and Trainers

Microsoft

- Certified Network Technicians and System Administrators
- Multifaceted experience - from one precinct jurisdictions to massive, multi-jurisdictional deployments and even state-wide implementations

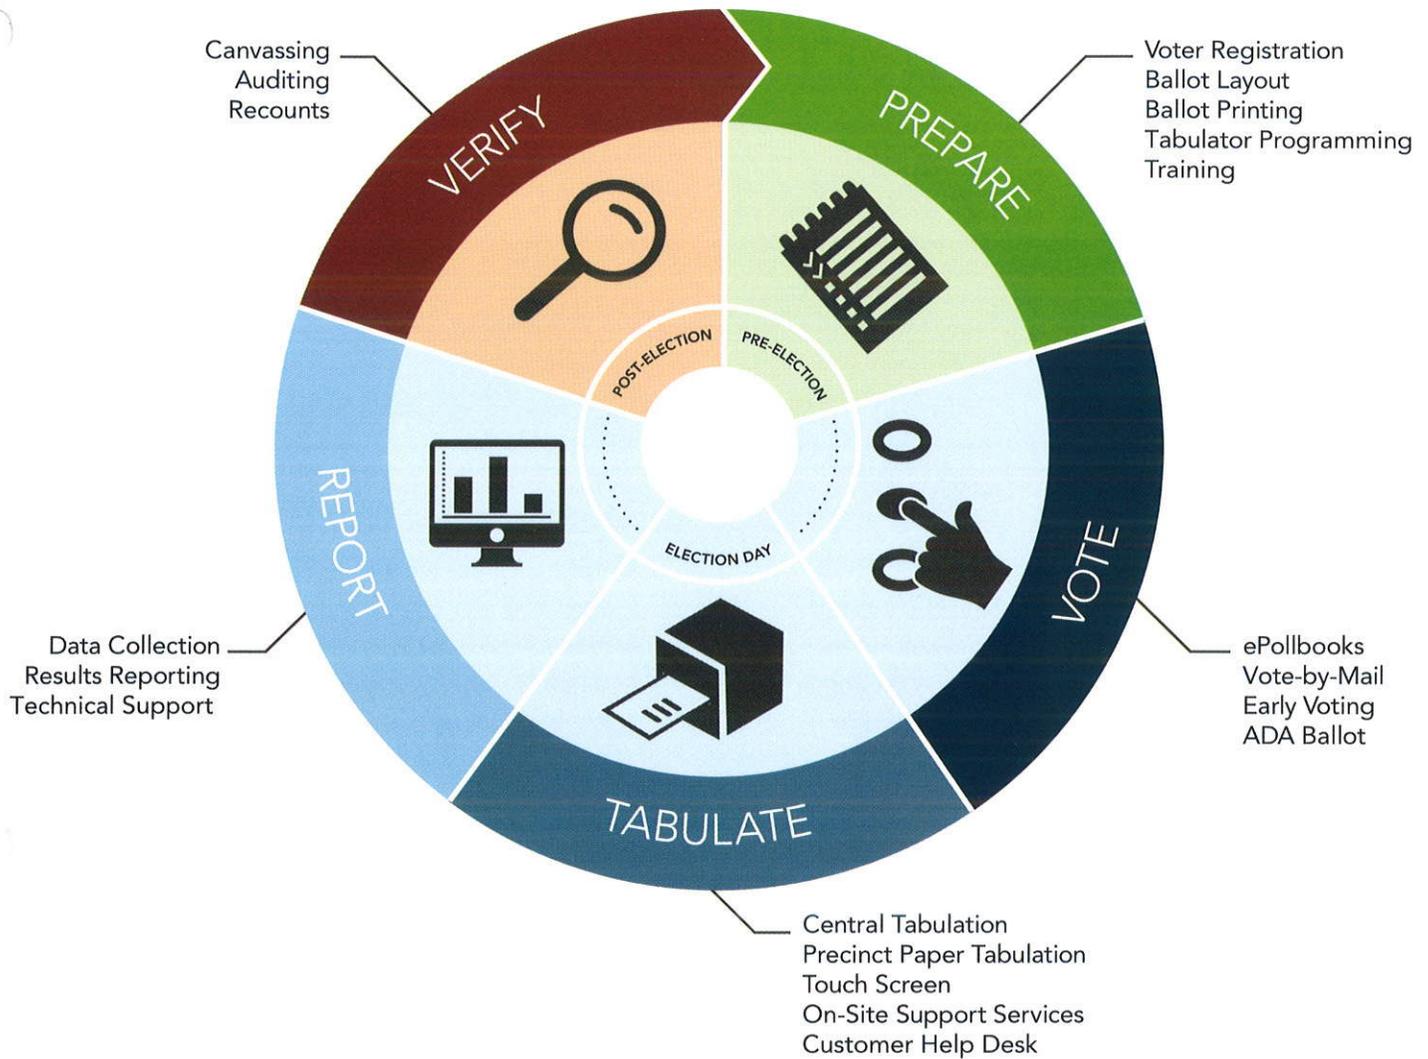

“The overview that you gave us was a great help in this election. I've been bragging on the quality of your process other counties around!”

— **Linn County Kansas**

“I just want to thank you... for the kindness and support you gave us this year and every year for the primary and general election. I am always confident that things will go smoothly when I know you are just a phone call away and we are always thankful to the visits and time you spend with us. I also must thank the wonderful technical support staff that has guided us through many issues that arose.”

— **Rockland County New York**

Our Business

Election Systems & Software entered the elections industry as a vote tabulation company. Over the years, we consistently expanded our capabilities to provide high-quality, innovative solutions to meet every election-related need -- ultimately improving the democratic process. From voter registration to vote tabulation, we pride ourselves on our ability to understand and manage each aspect of the election process.

Our multifaceted approach provides customers with the most robust election support in the world.

Today, we not only work with the same customers we've served for more than 40 years, but our business has grown to serve four countries, 41 states with more than 4,000 election offices.

Technical Support Service

Our Mission

Our top priority is to deliver exceptional service. We strive to ensure that you have a smooth and accurate election. Our Technical Support Department consists of Two Teams:

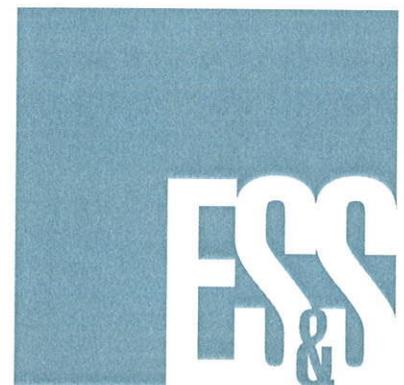

Hardware Support: experts on the physical tabulators, voting equipment and all of its peripheral devices such as printers and card readers.

Software Support: specialists on ES&S Unity programs used on the computer to facilitate your ballots, reporting and pollbooks.

ES&S is the world's largest and most experienced provider of total election management solutions. Our department has grown to support a customer base of more than 1,700 jurisdictions in the United States and more than 2,500 jurisdictions around the world. Our goal is to deliver exceptional service and ensure that our work aids in executing a smooth, reliable and accurate election.

experience.
reliability.
security.

Technical Support Service

Reliable

We are there when you need us, providing 24 hour Technical assistance for any ES&S Hardware or Software questions election night. Our Technical Support Hours have been extended on non-election weekdays from 7 AM to 7 PM CST.

Efficient

We understand your tight election schedule. Due to our extensive knowledge base and troubleshooting skills, we are able to resolve customer issues quickly and accurately.

Quality Assurance

Each call or email is documented in our call tracking system. This helps us to keep track of your progress and individual needs. Also, it enables us to create step-by-step reliable Technical Bulletins for special needs.

Service with a smile!

We understand that it's not all about technology, but about the organization, people, and processes that surrounds that technology.

The groundwork for a trouble-free election begins well before the votes are cast and doesn't end when the last ballot is counted. At ES&S, we do more than just sell you the box ... we provide a team to back you up all day, every day.

Local

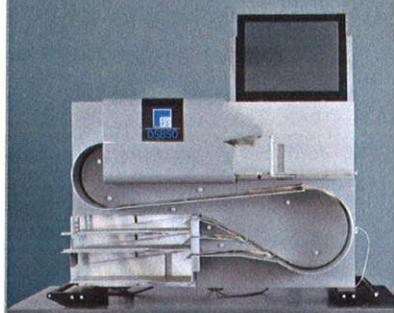

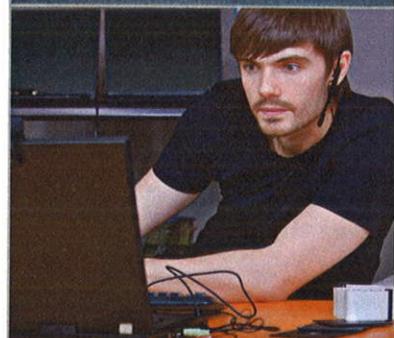

ES&S does not outsource its Technical Support Department. This allows our in-house specialized personnel to be available for all internal and external customers.

Experienced

In addition to offering Technical Support, we enjoy meeting our customers at various Site Support and Preventative Maintenance (PM) events. We understand your election needs. We have the hands-on experience required to assist our customers as well as other ES&S departments such as Election Services, Training, QA, and Development.

Membership Benefits

Receive subscription software and firmware updates, unlimited software and hardware support, preventative maintenance and repairs.

DEDICATED, EXPERIENCED, RELIABLE

"I have called several times with questions about various things. The ES&S staff has been very helpful! I have been so pleased with all of the help and support that they have given me! Thank you, Thank you!"

"Every time I call your staff is able to help me right away! I am extremely pleased with the knowledge and efficiency of your technical staff!"

On-Site Support Services

Maintaining Voter Confidence, Enhancing the Voting Experience

As the leading election provider, ES&S acts on progressive ideas to create simple, more valuable and trusted experiences on Election Day. On-site support delivers experiences that customers find truly valuable, giving them the ability to achieve results that count.

experience.
reliability.
security.
innovation.

Key Features and Benefits

Experience

Each ES&S associate undergoes extensive hands-on and computer based training in addition to actual site experience to be well prepared for any election needs. Annual refresher courses keep associates up-to-date on the latest technology and the elections' best practices.

Real Time

With on-site support, you have a dedicated point of contact at your election headquarters with immediate answers to questions and the ability able to provide guidance to any and all election staff.

Reassurance

Developing secure and reliable voting products and services is what ES&S does best. Partner with ES&S to give you the confidence to do what you do best—Elections.

Flexible

ES&S delivers truly valuable experiences to customers. Whether it's hardware support, call center assistance, rover field service or software support—we support it.

Services Examples

- Guidance on vote tabulator open, close and operations.
- Hardware troubleshooting
- Call center support
- Polling place field support
- Assistance with vote accumulation software

WHY ES&S?

At Election Systems & Software, we recognize the incredible responsibility we have to voters and election administrators. As a result, *Maintaining Voter Confidence*, and *Enhancing the Voting Experience* is the core of our mission.

ES&S focuses all their efforts on elections to understand voting systems and to provide election support services better than anyone else in the industry. With over 40 years of experience, supporting thousands of elections, our staff is well versed with the needs of our customers and the most important aspects of their elections.

ES&S is a trusted partner with unrivaled support resources, and industry leading products. Selecting ES&S guarantees you confidence and peace of mind.

No matter your needs... we're prepared to support you and your election.

experience.
reliability.
security.
innovation.

Key Features & Benefits

Ballot Design

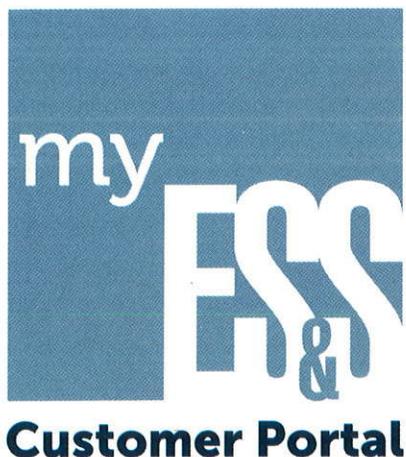

- Clear, easy-to-read ballot design
- Guaranteed compatibility with your tabulator
- Conforms with state and local requirements
- Final review and approval by you

Audio File Creation

- Maintain autonomy for voters who are visually impaired
- Compatible with ES&S tabulators
- Full comprehension of ADA compliance specifications
- Leverages ES&S' network of quality, trusted production studios

Tabulator Programming

- Comprehensive testing process ensures accurate tabulation
- ES&S sends testing results to jurisdictions for comparison
- Conforms with your state regulations
- Inventory control system to track election media

Your Free Online Resource

Convenience and election management come together in My ES&S™ online customer portal. Customers can access account information, submit forms, monitor status, and retrieve product documents.

Managing coding services and design has never been easier!

- Complete and submit Election Forms online, eliminating the hassle of paper forms and e-mails
- Helpful reminders about deadlines are sent to keep your county on track for a smooth election
- Simply transfer data from previous elections through copy and paste functionality, saving you time wasted constantly re-entering the same information
- Track order progress of coding media and printed ballots
- Single access point for documents, news, and information regarding ES&S products and services

Balotar

Ballot on Demand Printing

INNOVATION

for

[Early] VOTING

when deadlines don't move, how do you respond?

Balotar

Ballot on Demand Printing

facts ▶

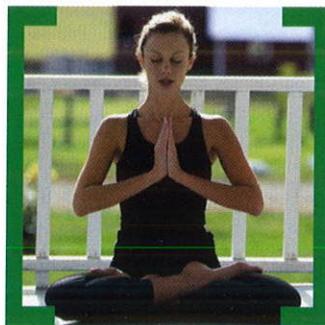

● Benefits

Cost Efficient

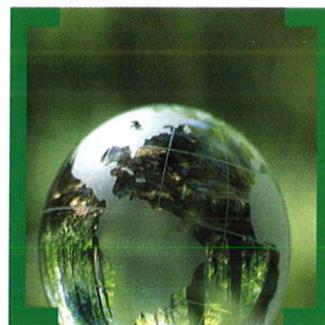

- Avoid pre-printing mass quantities
- Limit overtime costs
- Cut temporary staffing needs for ballot processing and inventory
- Fees are flexible for your budget

Stress Relief

- No more waiting for printer to deliver ballots in stages, i.e. Absentee and Early Voting, Election Day
- No delayed ballot deliveries
- Reduce Poll Worker error by getting the voter the correct ballot style
- Eliminate ballot shortages
- UOCAVA and Absentee ballots ready immediately

Environmentally Friendly

- Less paper waste
- Lower energy usage, i.e. saving fuel to ship ballots, saving energy at the press plant
- Reduction in chemical use and waste, i.e. ink and toner usage

Automated Ballot Management

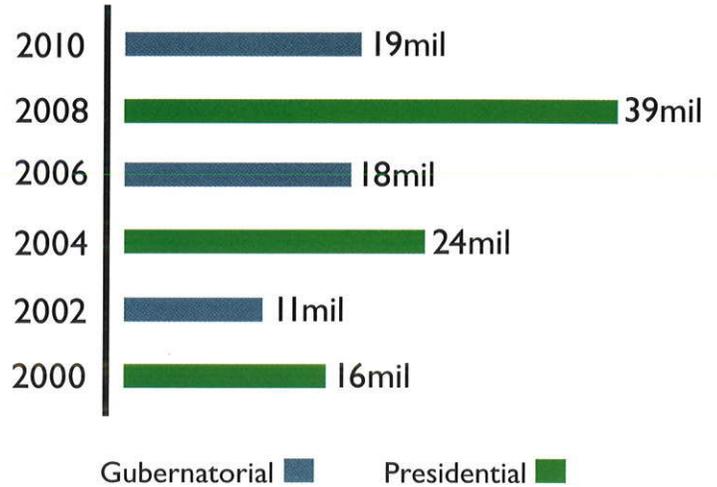

- Eliminates the need for organizing and storing mass quantities of ballots
- Eliminates the need to spend time estimating how many ballots to order from a commercial printer

Numbers of Advanced Voters since 2000

Advanced voting is on the rise as more voters cast their ballot before Election day either by mail or in-person at a local election office or vote center. According to the U.S. Census, early voting in-person and by mail has steadily grown since 1992, and exceeded a third of all votes cast in 2008.

HOW WILL YOU RESPOND TO THE DEMAND?

24/7

ES&S offers around the clock support for all your printing needs... before, during, and after your election.

19"

All ES&S BOD printers have the ability to **automatically duplex a 19" ballot**, saving jurisdictions from the cost of a two page ballot.

4,158

ES&S employees offer 4,158 collective years of election experience to our clients.

35%

In the 2010 General Election, more than 35% of all ballots were cast before Election Day.

0

The customer assumes zero risk as our warranty and service on the printer includes all repair cost and consumables.

Services

ES&S has eliminated all client's risk with our FULL SERVICE package. You as the customer will experience the highest levels of service and support from ES&S.

IMPLEMENTATION

Installation, testing and quality control is performed by ES&S

TRAINING

Customized classes taught by one of our BOD Subject Matter Experts

ON-SITE SUPPORT

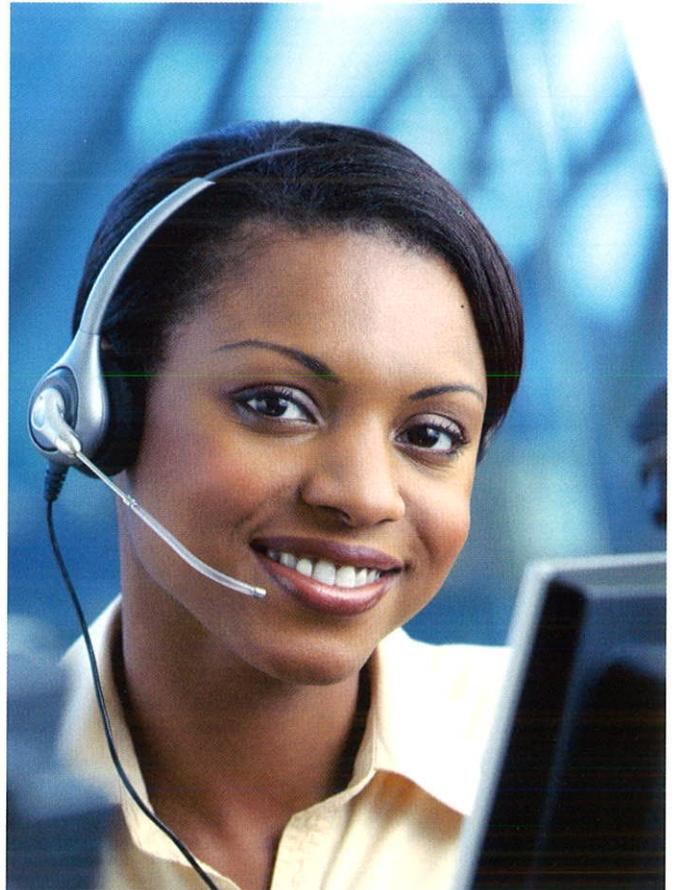

Trained ES&S personnel to support your Election needs

FIELD SUPPORT

Field technicians are positioned throughout the US to assure rapid response and resolution times

TECH SUPPORT

Our technicians are standing by 24 hours a day, 7 days a week

the future of ballot printing...

• F&S EVS5.0

Powerful Election Management

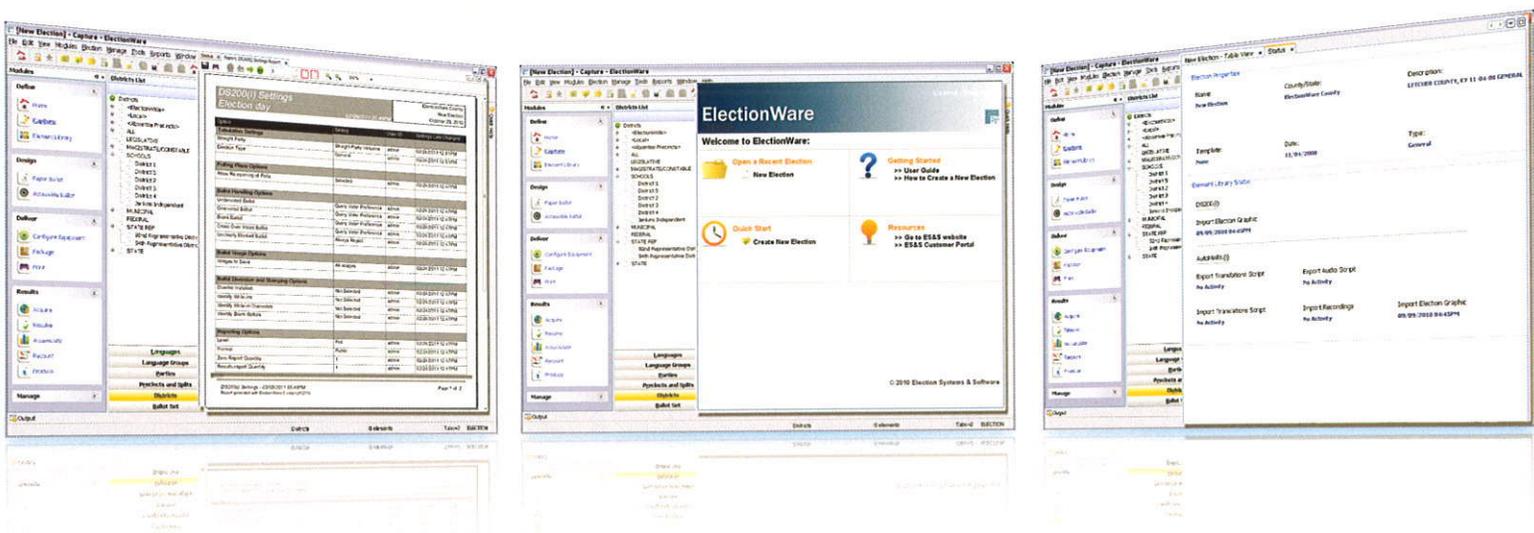

EVS 5.0 is our newest fully integrated election management solution. This suite provides enhancements to the DS200™, the industry's most widely used digital precinct scanner, the ADA compliant AutoMARK®, designed for voters with special needs, and the DS850™ the world's fastest and most accurate digital central scanner.

These advanced devices are supported by Electionware™, the industry's newest, most sophisticated, secure and reliable Election Management Software (EMS). This solution suite meets and exceeds the United States EAC's 2005 VVSG standards and brings forth a new realm of usability for voters and election officials alike. ES&S leveraged more than 30 years of election expertise to launch its 8th generation high-speed digital central scanner, the DS850.

Intelligent by design, ElectionWare, ESS's Election Management System solution, provides end-to-end election management activities through a powerful and intuitive user interface. Built on strengths of 40+ years of election software experience, its efficient and flexible design enables jurisdiction of all sizes to effectively manage their elections.

Compliant with the latest voting systems standards

ElectionWare meets known requirements of the U.S. Election Assistance Commission (EAC) 2005 Voluntary Voting Systems Guidelines.

Certificate of Conformance

ES&S EVS 5.0.0.0

The voting system identified on this certificate has been evaluated at an accredited voting system testing laboratory for conformance to the *2005 Voluntary Voting System Guidelines (2005 VVSG)*. Components evaluated for this certification are detailed in the attached Scope of Certification document. This certificate applies only to the specific version and release of the product in its evaluated configuration. The evaluation has been verified by the EAC in accordance with the provisions of the *EAC Voting System Testing and Certification Program Manual* and the conclusions of the testing laboratory in the test report are consistent with the evidence adduced. This certificate is not an endorsement of the product by any agency of the U.S. Government and no warranty of the product is either expressed or implied.

Product Name: EVS

Model or Version: 5.0.0.0

Name of VSTL: Wyle Laboratories

EAC Certification Number: ESSEVSS5000

Date Issued: May 16, 2013

*Chief Operating Officer and Acting Executive Director
U.S. Election Assistance Commission*

Scope of Certification Attached

Manufacturer: *Election Systems & Software*
System Name: *EVS 5.0.0.0*
Certificate: *ESSEVS5000*

Laboratory: *Wyle Laboratories*
Standard: *VVSG 1.0(2005)*
Date: *May 15, 2013*

Scope of Certification

This document describes the scope of the validation and certification of the system defined above. Any use, configuration changes, revision changes, additions or subtractions from the described system are not included in this evaluation.

Significance of EAC Certification

An EAC certification is an official recognition that a voting system (in a specific configuration or configurations) has been tested to and has met an identified set of Federal voting system standards. An EAC certification is **not**:

- An endorsement of a Manufacturer, voting system, or any of the system's components.
- A Federal warranty of the voting system or any of its components.
- A determination that a voting system, when fielded, will be operated in a manner that meets all HAVA requirements.
- A substitute for State or local certification and testing.
- A determination that the system is ready for use in an election.
- A determination that any particular component of a certified system is itself certified for use outside the certified configuration.

Representation of EAC Certification

Manufacturers may not represent or imply that a voting system is certified unless it has received a Certificate of Conformance for that system. Statements regarding EAC certification in brochures, on Web sites, on displays, and in advertising/sales literature must be made solely in reference to specific systems. Any action by a Manufacturer to suggest EAC endorsement of its product or organization is strictly prohibited and may result in a Manufacturer's suspension or other action pursuant to Federal civil and criminal law.

System Overview:

ES&S EVS 5.0.0.0 is comprised of the AutoMARK Voter Assist Terminal (AutoMARK), DS200 Precinct Digital Scanner (DS200), DS850 high-speed Central Count Digital Scanner, Election Ware, Election Reporting Manager (ERM), ES&S Event Log Service, Removable Media Service (RMS) and VAT Previewer.

- AutoMARK Voter Assist Terminal enables voters who are visually or physically impaired and voters more comfortable reading or hearing instructions and choices in an alternative language to privately mark optical scan ballots. The AutoMARK supports navigation through touchscreen, physical keypad or ADA support peripheral such as a sip and puff device or two position switch.

- DS200 digital scanner is a paper ballot tabulator designed for use as a polling place scanner. After the voter makes their selections on their paper ballot, their ballot is inserted into the unit for immediate tabulation. Both sides of the ballot are scanned at the same time using a high-resolution image-scanning device that produces ballot images.
- The DS850 is a high-speed, digital scan central ballot counter that uses cameras and imaging algorithms to capture voter selections on the front and back of a ballot, evaluate results and then sort ballots into discrete bins without interrupting scanning. A dedicated audit printer generates a continuous event log. Machine level reports are produced from a second, laser printer. The scanner saves voter selections and ballot images to an internal hard disk and exports results to a USB Memory stick for processing with Election Reporting Manager.
- ElectionWare integrates the election administration functionality into a unified application. Its intended use is to define an election and create the resultant media files used by the DS200 tabulator, AutoMARK™ Voter Assist Terminal (VAT), the DS850 Central Ballot Scanner, and Election Reporting Manager (ERM). An integrated ballot viewer allows election officials to view the scanned ballot and captured ballot data side-by-side and produce ballot reports.
- ES&S Event Log Service is a Windows Service that runs in the background of any active ES&S Election Management software application to monitor the proper functioning of the Windows Event Viewer. The ES&S Event Log Service closes any active ES&S software application if the system detects the improper deactivation of the Windows Event Viewer.
- The VAT Previewer is an application within the EMS program that allows the user to preview audio text and screen layout prior to burning Election Day media for the AutoMARK™.
- Removable Media Service (RMS) is an application that runs in the background of the EMS client workstation and supports the installation and removal of election and results media.
- Election Reporting Manager (ERM) generates paper and electronic reports for election workers, candidates, and the media. Jurisdictions can use a separate ERM installation to display updated election totals on a monitor as ballot data is tabulated, and send the results' reports directly to the media outlets.
ERM supports accumulation and combination of ballot results data from all ES&S tabulators. Precinct and accumulated total reports provide a means to accommodate candidate and media requests for totals and are available upon demand. High-speed printers are configured as part of the system accumulation/reporting stations PC and related software.

Mark definition:

ES&S' declared level mark recognition for the DS200 and DS850 is a mark across the oval that is 0.2" long x 0.03" wide at any direction.

Tested Marking Devices:

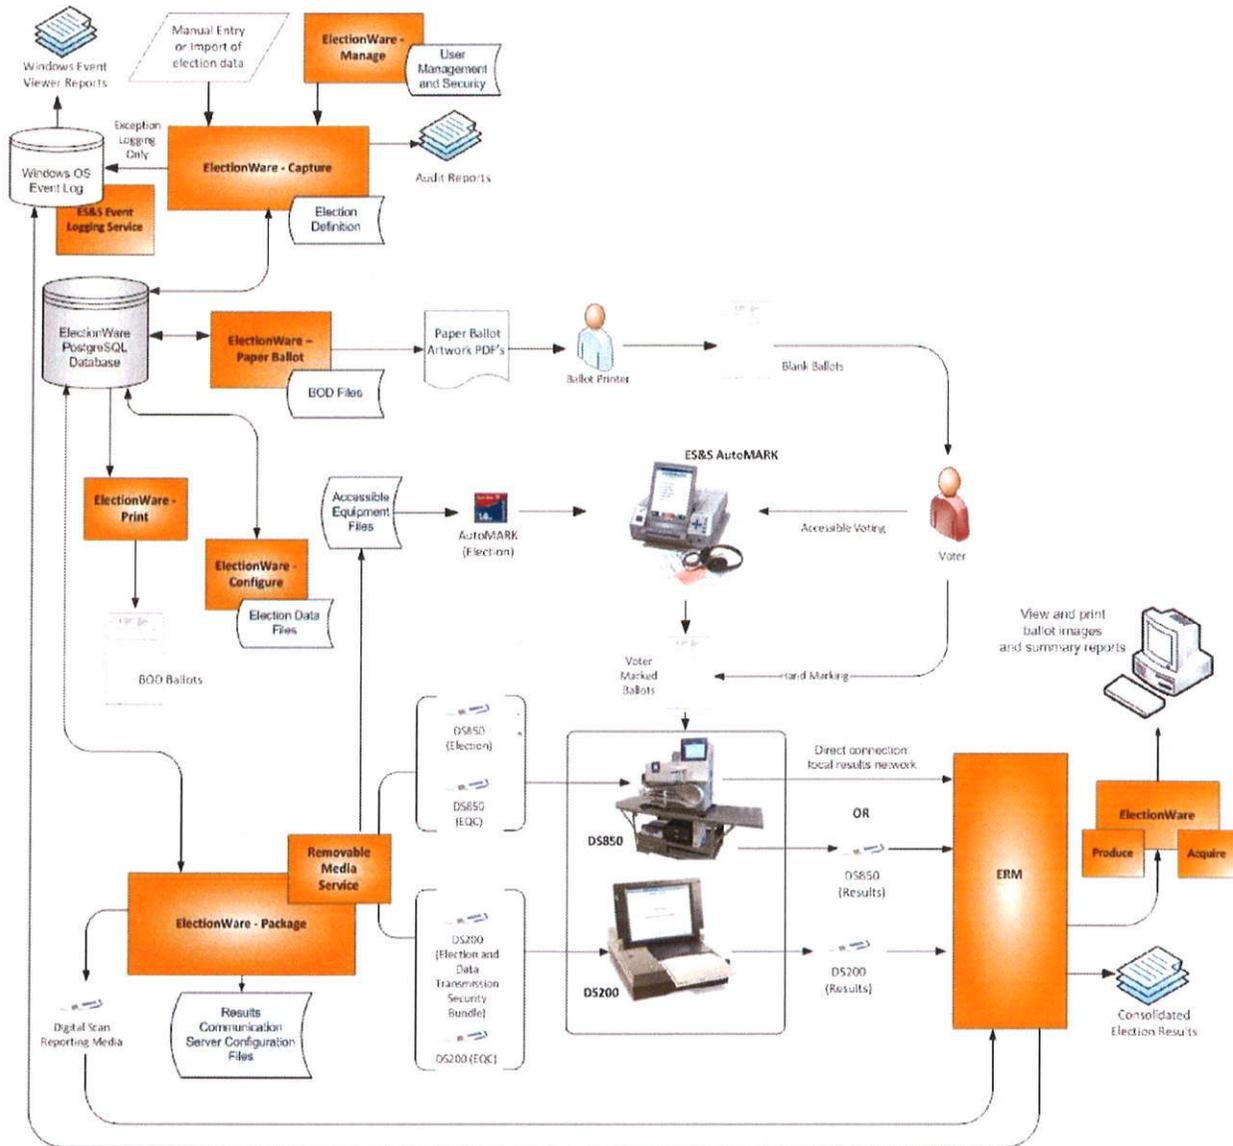

Bic Grip Roller Pen

Language capability:

EVS 5.0.0.0 supports English, Spanish, Chinese, Korean and Japanese ballot languages.

Components Included:

This section provides information describing the components and revision level of the primary components included in this Certification.

System Component	Software or Firmware Version	Hardware Version	Operating System or COTS	Comments
DS200	2.7.0.0	1.2		Precinct Digital Scanner
AutoMARK A100	1.8.1.0	1.0		ADA Ballot Marking Device
AutoMARK A200	1.8.1.0	1.1, 1.3		ADA Ballot Marking Device
AutoMARK A300	1.8.1.0	1.3		ADA Ballot Marking Device
DS850	2.4.0.0	1.0		Central Count Scanner, high-speed
Ballot Box Hardware		1.2, 1.3		Plastic ballot box
Ballot Box Hardware		1.0, 1.1, 1.2		Metal ballot box with/without diverter
Election Ware	4.1.0.0			
Election Reporting Manager (ERM)	8.6.0.0			
ES&S Event Log Service	1.5.0.0			
VAT Previewer	1.8.1.0			
Removable Media Service	1.4.0.0			
EMS Reporting Workstation		Dell Optiplex 980		
EMS Server		Dell PowerEdge T710		
EMS reporting Laptop		Dell Latitude E6410		
Ballot on Demand Printer		OKI B6300		
DS850 Report Printer		OKI B430dn		Laser report printer
DS850 Report Printer		Microline 420		Dot Matrix Printer
DS850 Audit Log		HP LaserJet 4050N		
Headphones		Avid FV-060		
USB Flash Drive		Delkin 512MB		
USB Flash Drive		Delkin 4GB		
USB Flash Drive		Delkin 8 GB		
USB Flash Drive		Delkin 1 GB		
USB Flash Drive		Delkin 2 GB		
Compact Flash		SanDisk 1.0 GB capacity & 2.0 GB capacity. Toshiba 1.0 GB capacity		

System Limitations

This table depicts the limits the system has been tested and certified to meet.

System Characteristic	Boundary or Limitation	Limiting Component
Max. precincts allowed in an election	At least 9900	ERM
Max. count for any precinct element	500,000 (65,500 from any tabulator media)	ERM report (ERM results import)
Max. candidates allowed per election	Depends on election content (limited by 21,000 maximum counters) ¹	ERM
Max. contests allowed in an election	Depends on election content (limited by 21,000 maximum counters) ²	ERM
Max. counters allowed per precinct	Limits candidates and contests assigned to a precinct to 1,000 ³	ERM
Max. contests allowed per ballot style	200 or number of positions on ballot	N/A
Max. candidates (ballot choices) allowed per contest	175	ERM (database create)
Max. number of parties allowed	General election: 75 Primary election: 20 (including nonpartisan party)	ERM (database create)
Max. 'vote for' per contest	98	ERM (database create)
Ballot formats	All paper ballots used in an election must be the same size and contain the number of response rows.	Ballot scanning equipment
Max. Ballot Styles	9900	ERM
Max. District Types/Groups	20	ERM
Max. districts of a given type ⁴	40	ERM

¹ Calculation of the number of counters must include a minimum of 4 counters for each contest, 3 overhead (overvote, undervote, precincts counted) and at least 1 candidate. Additional contest candidates each add a counter. If some precincts are defined as Absentee, a fourth overhead counter (absentee precincts counted) must be added to each contest. The number of statistical counters (Ballots Cast, Registered voters) must be added to the contest counters to determine the total counters.

² Example of maximum contest calculation if all contests had 2 candidates (5 counters each, 3 overhead counters + 2 candidates) and there were 10 statistical counters (i.e. Ballots Cast-Total, Republican, Democratic, Libertarian, Nonpartisan and Registered Voters-Total, Republican, Democratic, Libertarian, Nonpartisan. $(21000-20)/5 = 4196$ or $(\text{counter limit} - \text{statistics} \times 2)/\text{number of counters}/\text{contest} = \text{number of contests}$.

³ Contest counters are calculated as indicated in footnote 1, but two counters must be added for each statistical counter defined for the precinct. There are a minimum of 3 statistic counters assigned to each precinct (six added counters), "Ballots Cast," "Registered Voters" and "Ballots Cast Blank."

⁴ Excludes the Precinct Group which contains all precincts.

System Characteristic	Boundary or Limitation		Limiting Component
Supported Languages	<ul style="list-style-type: none"> • English • Spanish • Chinese 	<ul style="list-style-type: none"> • Korean • Japanese 	System Configuration

Component Limitations:

PAPER BALLOT LIMITATIONS

1. The paper ballot code channel, which is the series of black boxes that appear between the timing track and ballot contents, limits the number of available ballot variations depending on how a jurisdiction uses this code to differentiate ballots. The code can be used to differentiate ballots using three different fields defined as: Sequence (available codes 1-26,839), Type (available codes 1-30) or Split (available codes 1-40).
2. If Sequence is used as a ballot style ID, it must be unique election-wide and the Split code will always be 1. In this case the practical style limit would be 26,000.

DS200

The ES&S DS200 configured for an early vote station does not support precinct level results reporting. An election summary report of tabulated vote totals is supported.

AUTOMARK Voter Assist Terminal

ES&S AutoMARK capacities exceed all documented limitations for the ES&S election management, vote tabulation and reporting system. For this reason, Election Management System and ballot tabulator limitations define the boundaries and capabilities of the AutoMARK system as the maximum capacities of the ES&S AutoMARK are never approached during testing

Election Ware

ElectionWare capacities exceed the boundaries and limitations documented for ES&S voting equipment and election reporting software. For this reason, ERM and ballot tabulator limitations define the boundaries and capabilities of ElectionWare system.

ELECTION REPORTING MANAGER

1. Election Reporting Manager requires a minimum monitor screen resolution of 800x600.
2. ERM Database Create allows 1600 Precincts per Ballot Style.
3. There is a limit of 3510 precincts in the precincts counted/not counted display.
4. There is a limit of 3000 precincts in the precincts counted/not counted scrolling display.

5. Contest/Precinct selection pop up display limited to 3000 contests/precincts.
6. Non-English characters are not supported in ERM. This has to do with the creation of the XML results file out of ERM.
7. ERM's maximum page size for reports is 5,000 pages.
8. Generating a District Canvass Report without first properly creating a .DST file can result in inaccurate totals reports and inconsistent report formatting.

Functionality

2005 VVSG Supported Functionality Declaration

Feature/Characteristic	Yes/No	Comment
Voter Verified Paper Audit Trails		
VVPAT	No	
Accessibility		
Forward Approach	Yes	
Parallel (Side) Approach	Yes	
Closed Primary		
Primary: Closed	Yes	
Open Primary		
Primary: Open Standard (provide definition of how supported)	Yes	
Primary: Open Blanket (provide definition of how supported)	No	
Partisan & Non-Partisan:		
Partisan & Non-Partisan: Vote for 1 of N race	Yes	
Partisan & Non-Partisan: Multi-member ("vote for N of M") board races	Yes	
Partisan & Non-Partisan: "vote for 1" race with a single candidate and write-in voting	Yes	
Partisan & Non-Partisan "vote for 1" race with no declared candidates and write-in voting	Yes	
Write-In Voting:		
Write-in Voting: System default is a voting position identified for write-ins.	Yes	
Write-in Voting: Without selecting a write in position.	Yes	
Write-in: With No Declared Candidates	Yes	
Write-in: Identification of write-ins for resolution at central count	Yes	
Primary Presidential Delegation Nominations & Slates:		
Primary Presidential Delegation Nominations: Displayed delegate slates for each presidential party	No	
Slate & Group Voting: one selection votes the slate.	No	
Ballot Rotation:		
Rotation of Names within an Office; define all supported rotation methods for location on the ballot and vote tabulation/reporting	Yes	
Straight Party Voting:		

Feature/Characteristic	Yes/No	Comment
Straight Party: A single selection for partisan races in a general election	Yes	
Straight Party: Vote for each candidate individually	Yes	
Straight Party: Modify straight party selections with crossover votes	Yes	
Straight Party: A race without a candidate for one party	Yes	
Straight Party: N of M race (where "N">1)	Yes	
Straight Party: Excludes a partisan contest from the straight party selection	Yes	
Cross-Party Endorsement:		
Cross party endorsements, multiple parties endorse one candidate.	Yes	
Split Precincts:		
Split Precincts: Multiple ballot styles	Yes	
Split Precincts: P & M system support splits with correct contests and ballot identification of each split	Yes	
Split Precincts: DRE matches voter to all applicable races.	No	
Split Precincts: Reporting of voter counts (# of voters) to the precinct split level; Reporting of vote totals is to the precinct level	Yes	It is possible to list the number of voters.
Vote N of M:	Yes	
Vote for N of M: Counts each selected candidate, if the maximum is not exceeded.	No	
Vote for N of M: Invalidates all candidates in an overvote (paper)	No	
Recall Issues, with options:		
Recall Issues with Options: Simple Yes/No with separate race/election. (Vote Yes or No Question)	Yes	
Recall Issues with Options: Retain is the first option, Replacement candidate for the second or more options (Vote 1 of M)	Yes	
Recall Issues with Options: Two contests with access to a second contest conditional upon a specific vote in contest one. (Must vote Yes to vote in 2 nd contest.)	No	
Recall Issues with Options: Two contests with access to a second contest conditional upon any vote in contest one. (Must vote Yes to vote in 2 nd contest.)	No	Overtured - US District Court 7/29/03: CA Election Code sect. 11383
Cumulative Voting		
Cumulative Voting: Voters are permitted to cast, as many votes as there are seats to be filled for one or more candidates. Voters are not limited to giving only one vote to a candidate. Instead, they can put multiple votes on one or more candidate.	No	
Ranked Order Voting		
Ranked Order Voting: Voters can write in a ranked vote.	No	
Ranked Order Voting: A ballot stops being counting when all ranked choices have been eliminated	No	
Ranked Order Voting: A ballot with a skipped rank counts the vote for the next rank.	No	

Feature/Characteristic	Yes/No	Comment
Ranked Order Voting: Voters rank candidates in a contest in order of choice. A candidate receiving a majority of the first choice votes wins. If no candidate receives a majority of first choice votes, the last place candidate is deleted, each ballot cast for the deleted candidate counts for the second choice candidate listed on the ballot. The process of eliminating the last place candidate and recounting the ballots continues until one candidate receives a majority of the vote	No	
Ranked Order Voting: A ballot with two choices ranked the same, stops being counted at the point of two similarly ranked choices.	No	
Ranked Order Voting: The total number of votes for two or more candidates with the least votes is less than the votes of the candidate with the next highest number of votes, the candidates with the least votes are eliminated simultaneously and their votes transferred to the next-ranked continuing candidate.	No	
Provisional or Challenged Ballots		
Provisional/Challenged Ballots: A voted provisional ballots is identified but not included in the tabulation, but can be added in the central count.	Yes	
Provisional/Challenged Ballots: A voted provisional ballots is included in the tabulation, but is identified and can be subtracted in the central count	Yes	
Provisional/Challenged Ballots: Provisional ballots maintain the secrecy of the ballot.	Yes	
Overvotes (must support for specific type of voting system)		
Overvotes: P & M: Overvote invalidates the vote. Define how overvotes are counted.	Yes	
Overvotes: DRE: Prevented from or requires correction of overvoting.	No	
Overvotes: If a system does not prevent overvotes, it must count them. Define how overvotes are counted.	Yes	
Overvotes: DRE systems that provide a method to data enter absentee votes must account for overvotes.	No	
Undervotes		
Undervotes: System counts undervotes cast for accounting purposes	Yes	
Blank Ballots		
Totally Blank Ballots: Any blank ballot alert is tested.	Yes	
Totally Blank Ballots: If blank ballots are not immediately processed, there must be a provision to recognize and accept them	Yes	
Totally Blank Ballots: If operators can access a blank ballot, there must be a provision for resolution.	Yes	
Networking		
Wide Area Network – Use of Modems	No	
Wide Area Network – Use of Wireless	No	
Local Area Network – Use of TCP/IP	No	
Local Area Network – Use of Infrared	No	
Local Area Network – Use of Wireless	No	
FIPS 140-2 validated cryptographic module	No	
Used as (if applicable):		

Feature/Characteristic	Yes/No	Comment
Precinct counting device	Yes	DS200
Central counting device	Yes	DS850

DS850™

Central Scanner & Tabulator

The Next Generation of Paper-Based Vote Tabulation

You need a Central Tabulator that is quick and accurate. The DS850™ gives you that and more. With its high-speed digital imaging solution, it continuously scans ballots to save you valuable time.

As the Election Industry leader, ES&S is committed to providing solutions to Election Administrators. Nothing is more important to us than supporting your successful election. We build tabulators that make that possible.

Intelligent Mark Recognition

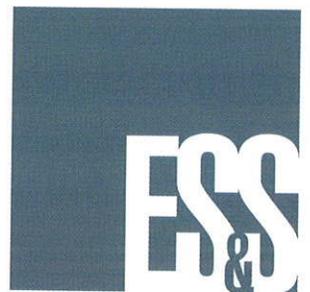

Leave nothing to chance. Other manufacturers put the responsibility on you to determine what marks should count as votes. Instead, our patented IMR uses algorithms to learn voter behavior, intelligently determining voter intent.

Accurate

When put to the test in Florida, our DS850 successfully scanned 9 million unique marks with 100% accuracy—the DS850 does not miss!

experience
reliability
security
innovation

ES&S DS850™ Central Scanner & Tabulator

High-Speed Sorting, No Stopping

DS850™ is the only high-speed scanner able to sort various ballot sizes at full speed. It scans and sorts 300 14-inch double-sided ballots per minute into three input and output trays. It separates ballots into counted, requires further review, and write-ins categories.

Folded Ballot Processing

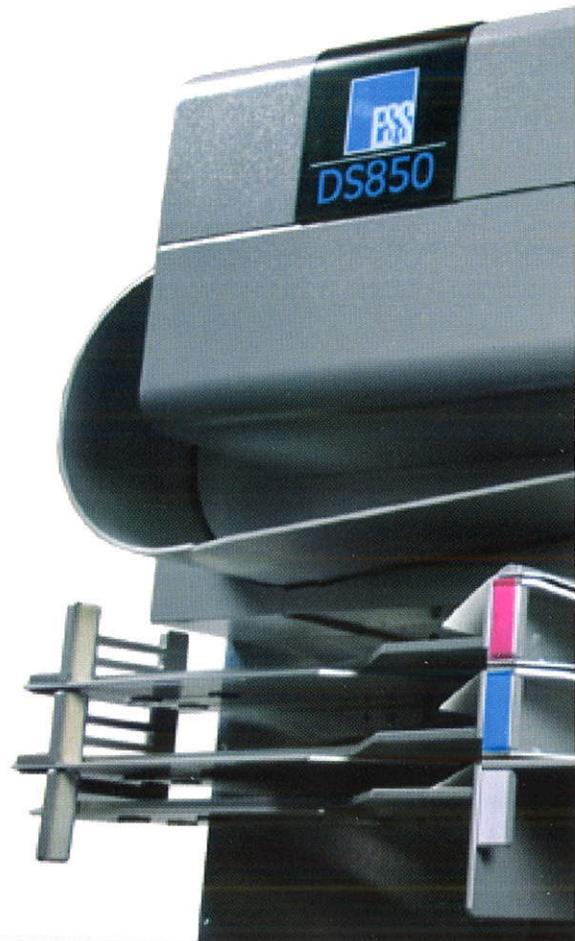

Designed with a series of patent-pending TruGrip™ composite paper rollers constant pressure is applied to keep control throughout the entire process. The ability to scan folded ballots provides Election Administrators with the flexibility to send out folded vote-by-mail ballots—save money without sacrificing time!

2005 VVSG Compliant

Fully compliant with 2005 Voluntary Voting Systems Guidelines for usability, accessibility, and security requirements.

User-Friendly Design and Operation

Designed specifically for the election process, the DS850™ features a user-friendly software interface on a 15-inch LCD color touch screen. The S-shaped transporter enables superior and natural flow to separate the ballots.

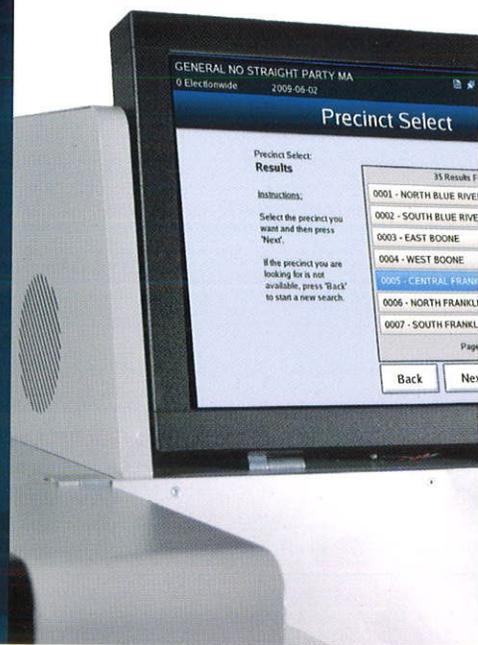

Hardware Features

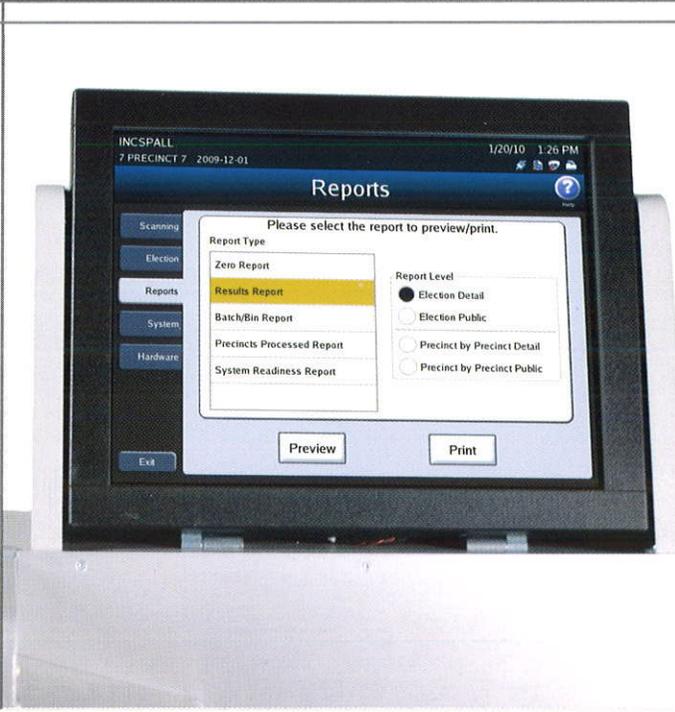

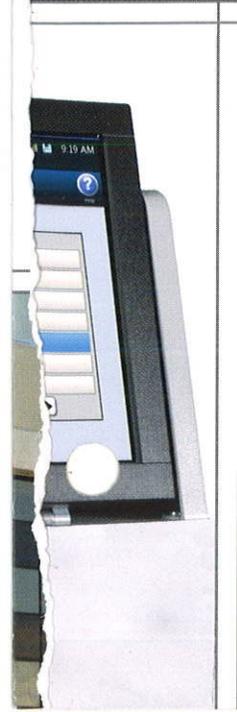

Touch Screen Display

Increase durability and conserve valuable space with the incorporated 15-inch LCD color touch screen. It has an adjustable display to make it comfortable for viewing.

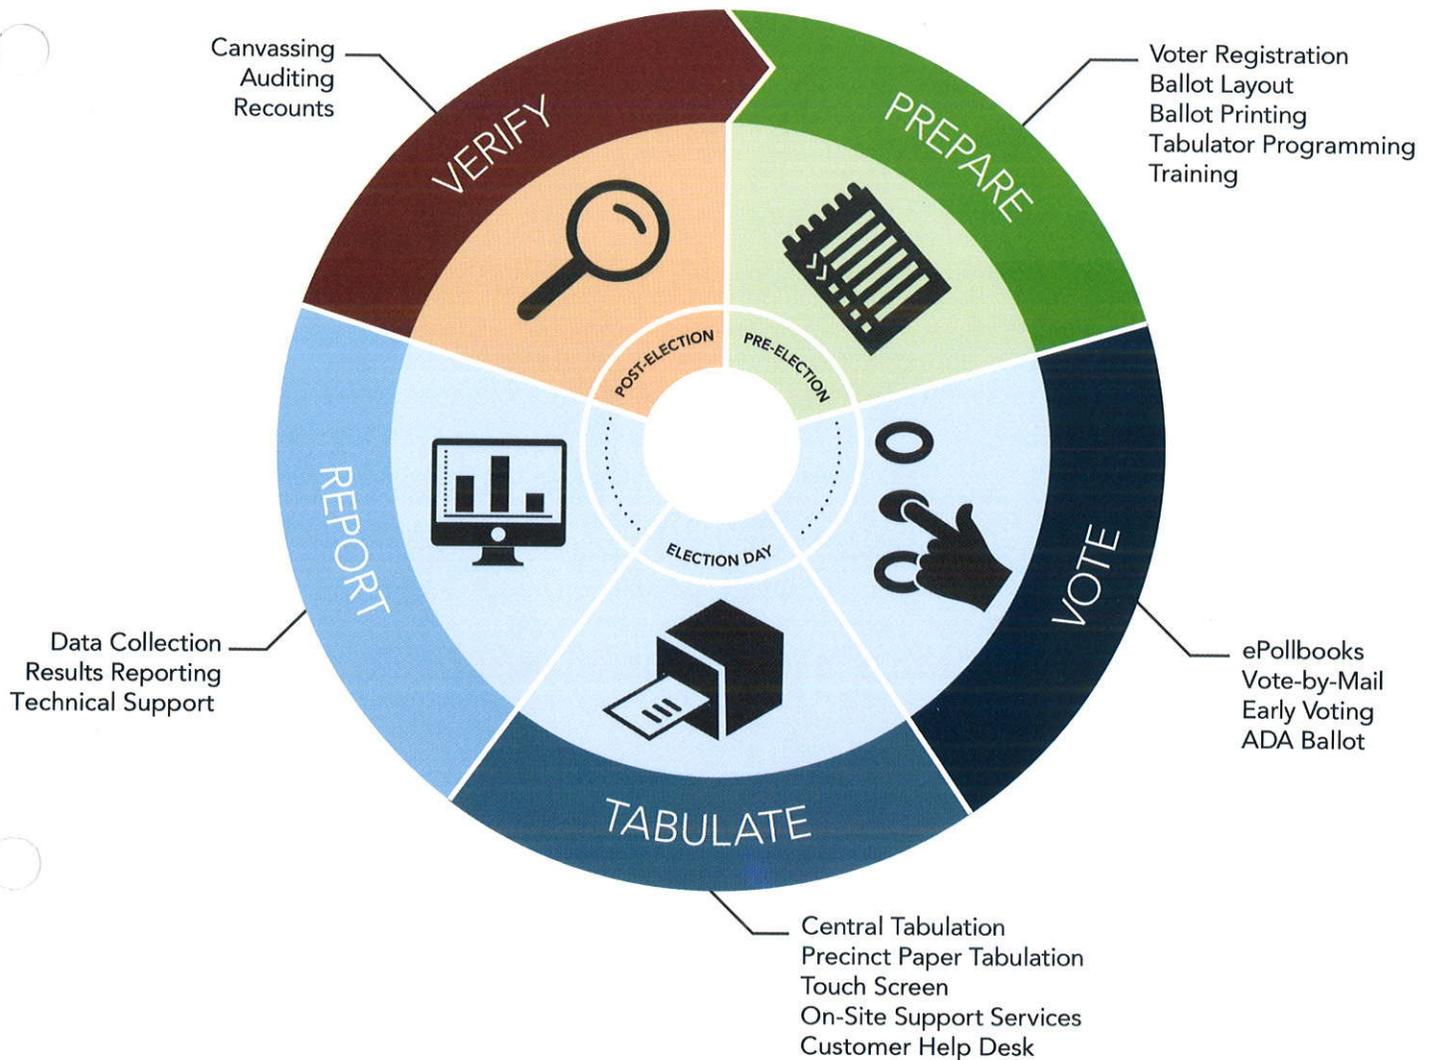

Security and Accuracy

System integrity and electronic audits make this product the most dependable central voter available. Safeguards such as data encryption and digital signatures help protect sensitive data and verify authenticity. It validates all firmware is certified.

Our Business

Election Systems & Software entered the elections industry as a vote tabulation company. Over the years, we consistently expanded our capabilities to provide high-quality, innovative solutions to meet every election-related need -- ultimately improving the democratic process. From voter registration to vote tabulation, we pride ourselves on our ability to understand and manage each aspects of the election process.

Our multifaceted approach provides customers with the most robust election support in the world.

Today, we not only work with the same customers we've served for more than 40 years, but our business has grown to serve four countries, 41 states with more than 4,000 election offices.

DS200[®]

The Next Generation Precinct Tabulator & Scanner

The Next Generation

ES&S' experience combined with customer feedback and industry's best practices take traditional optical scanning to a new level. The DS200[®] is an intelligent, advanced, integrated solution. It features the latest digital image technology available on the market.

Top 5 Reasons DS200[®] is the Best

Wireless: Accumulates and transmits votes directly from the polling place via wireless connection

Flexible: Processes a variety of ballot sizes and designs, from 11" to 19", including the Expressvote Ballot Activation Card

Convenient: Lightweight, compact, and easy to set up and use in the polling place

Progressive: Includes extra USB ports and expandable memory to accommodate future EAC standards

Smart: Uses Intelligent Mark Recognition technology to remove the guesswork of determining what dictates a mark for a candidate

experience.
reliability.
security.
innovation.

Benefits and Features

2005 VVSG Compliant

Fully compliant usability, accessibility, and security enhancements with the 2005 Voluntary Voting Systems Guidelines

Accessible

Independence and privacy is guaranteed for people with special needs by accepting ballot from the AutoMARK®, our ballot-marking device

Large Communication Screen

12-inch LCD touch screen improves voter communication and supports multiple languages

Integrated Thermal Printer

Thermal paper eliminates the worry of running out of ink on Election Day

Power Management

Internal battery pack provides reliable and sustained power management, even in the event of a power outage

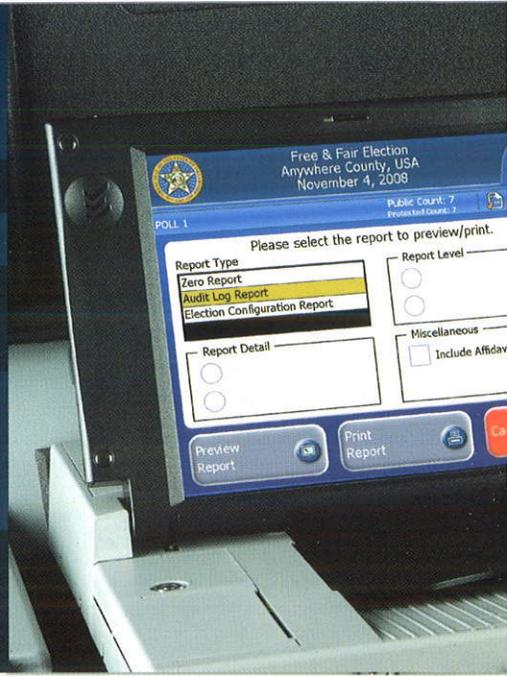

Interactive Touch Screen:

Opening and closing polls is easier with the DS200®. The large touch screen improves the user experience. Election staff and poll workers agree that setup, diagnostic functions and online help are easy with the DS200®.

Voters benefit from real-time prompts flagging over-voted, under-voted, and blank ballots.

Improve the election experience with ES&S' DS200®.

DS200 Achievements & Successes

Certification of Unity 3.4.0.0

ES&S is proud to introduce our pairing of the DS200® with the world's fastest, most precise digital central scanner -- DS850®. The suite enhances the DS200® and the AutoMARK® for voters with special needs.

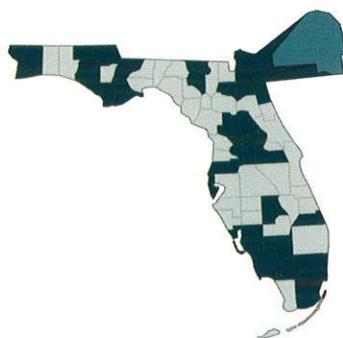

This latest suite of software has set a new standard of usability for voters and election officials.

AutoMARK[®]

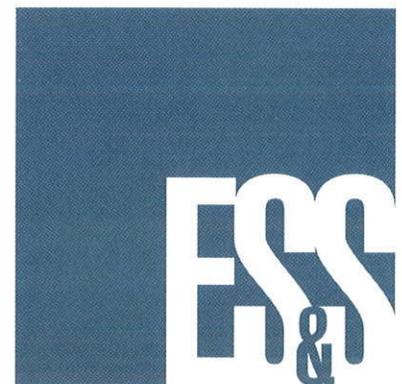

Voter Assist Terminal

Election officials and organizations representing people with disabilities voiced a need for voters with special needs to gain the ability to mark their ballot independently and privately. ES&S listened, and developed the AutoMARK[®], a ballot-marking system designed to provide autonomy to voters who are blind, visually impaired, or have a disability or condition which makes it difficult to traditionally mark a ballot. Utilizing revolutionary technology, AutoMARK[®] Voter Assist Terminal is the future of paper ballot-marking technology.

Simply adding an ES&S AutoMARK[®] device to your polling location ensures compliance with the federal Help America Vote Act (HAVA) accessibility requirement and eliminates the need to reinvest in a new tabulation system.

Key Features and Benefits

AutoCAST™

Allows voters to cast the ballot without assistance directly into a secure ballot box after verification

Hash Check

Provides jurisdictions opportunity to validate securely the firmware version

Audio Function

- Voter hears list of candidates through headphones
- Synthesized voice enables voter control of speech speed and volume
- Choices may be repeated easily
- Selections are read back to voter at end of session, ensuring proper selection was made

Summary Verification Process

Ensures that no races are accidentally under-voted, over-voted or left blank providing opportunity to adjust selections before casting their ballot

Zoom feature

- Voters are able to increase font size displayed on the viewing touch screen
- Adjustable brightness contrast helps voters with limited vision or macular degeneration
- Compatible with current voting systems

Sip/puff tube

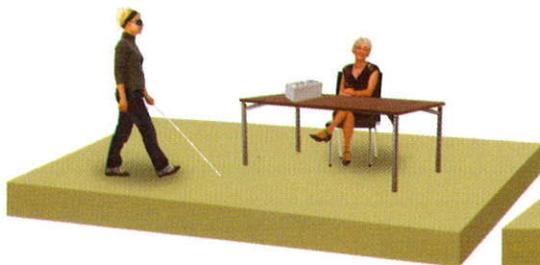

- Voters unable to use the touch screen or touch pad are able to vote autonomously

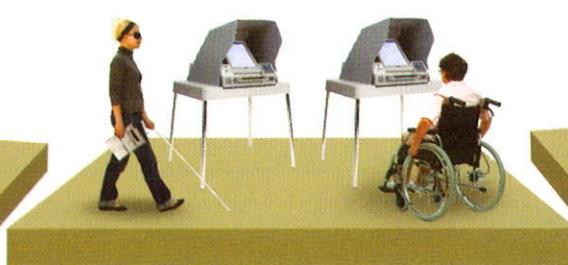

1

2

3

Voter picks up paper ballot at registration desk and is directed to the AutoMARK® voting station

Selections are made by voter autonomously using the AutoMARK® accessories

After ballot is marked and verified, voter may deposit ballot into DS200™ or give to poll work for tabulation through DS850™

MAINTAINING VOTER CONFIDENCE. ENHANCING THE VOTING EXPERIENCE.

11208 John Galt Boulevard | Omaha, NE 68137 USA | P: 402.593.0101 | TF: 1.800.247.8683 | F: 402.593.8107
www.essvote.com | hardware@essvote.com | software@essvote.com

AutoMARK®

ADA Accessories

ES&S' AutoMARK® provides voters with special needs a way to cast paper ballots privately and independently. With a variety of enhanced accessories, this paper ballot-marking system ensures autonomy for all voters. Additional options are available to facilitate convenient transfer and storage of the product. ES&S partners with AutoMARK® customers to develop any accessory, even customized enhancements, to fit your jurisdiction's requirements.

Privacy & Accessibility Features

Ballot Sleeve

To ensure complete privacy, voters can turn off the touch screen display and after voting place their printed selections into the privacy ballot sleeve.

Rocker Paddle

Voters with limited motor control can navigate election contests with the AutoMARK® Rocker Paddle. Hands, feet, or forearms can be used to make selections and cast a vote.

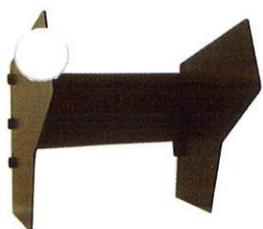

Sip/Puff Tube

ES&S' AutoMARK® can be controlled through a voter's sip/puff.

Head Pointer

Voters can utilize their head pointer to tap and select their candidates on the touch screen.

Privacy Shield

Protecting voters' selections is simple with the Privacy Shield. It wraps around the equipment and integrates into the AutoMARK® table.

AutoCAST™ Rear Tray

AutoMARK® is the only ballot-marking device offering AutoCAST™, a means for voters without fine motor control or use of their hands to verify and cast their ballot into a secure container.

Storage & Transport Accessories

AutoKart Hard Cart

This wheeled metal frame stores and transports six packed AutoMARK hard cases or 10 empty cases. Not only does this solution save significant space, but it offers flexibility that fixed shelving cannot.

ES&S AutoKart™

The AutoKart is a compact, integrated solution for jurisdictions using precinct scanners in conjunction with the AutoMARK. Consolidating voting equipment into a mobile precinct is achieved with one end of the AutoKart holding the optical scanner and the other holding the AutoMARK. Pullout shelving provides full accessibility from a wheelchair. The design allows both the AutoMARK and optical scanner to be used simultaneously.

The ballot box, scanner, and AutoMARK remain in the AutoKart during storage, deployment, and the election process. Additional space is provided for storage of up to six suitcase style voting booths. A container is included for precinct supplies and forms.

AutoMARK Solo Cart

Unique design allows a single AutoMARK to be transported conveniently. The Solo Cart is equipped with four lockable wheels making it easy to roll the machine out of storage, into a transport vehicle and directly into the polling place. During voting process, the AutoMARK machine remains in the cart and its the doors provide a privacy shield.

ES&S AutoMARK Table

AutoMARK Table is built with sturdy, structural plastic which assembles in minutes. Constructed without hinges with a 30-inch clearance between table legs and sits 27-inches in height, voters in wheelchairs are able to maneuver comfortably. It exceeds

wheelchair compliance standards set by the Americans with Disabilities Act (ADA). The AutoMARK Table is equipped with a privacy shield to maintain privacy. The table along with the privacy shield and reusable corrugated shipping container weighs only 16 pounds.

ES&S AutoMARK Collapsible Table

The AutoMARK can be fitted into a collapsible table to temporarily provide a sturdy surface during elections. The table meets ADA height requirement, making it wheelchair accessible. Privacy shield is also provided and fits around the AutoMARK to protect the voter's privacy. The carrying case can be stored within

the exterior of the table. The table is integrated with luggage handles and four heavy-duty caster wheels. Setup is simple because it pivots on its edge and never needs to be lifted.

MAINTAINING VOTER CONFIDENCE. ENHANCING THE VOTING EXPERIENCE.
